Summary

Driven software developer with strong problem-solving skills and real-world development experience, valued for rapid learning, adaptability, and team collaboration in delivering scalable products.Explored serverless architecture and event-driven systems to improve application scalability and performance.

Professional Experience

01/2025 – Present

Software Developer

Right UpNext Innovations - Coimbatore

- **Frontend Development:** Built responsive and user-friendly interfaces using HTML, CSS, Bootstrap, Tailwind TypeScript, Jest(Unit Testing),Redux, TanStack (React Query), and third-party libraries along with Chrome DevTools, throttling/debouncing, and performance optimization techniques to enhance application responsiveness, maintainability, and overall user experience.
- **Backend Development:** Designed and implemented server-side logic using Node.js, Python, and Flask, building scalable and secure RESTful APIs with JWT authentication, role-based access control, and robust error handling. Applied logging, environment-based configuration, and performance optimization techniques to enhance reliability and maintainability. Worked with AWS services such as Lambda, S3, and API Gateway for backend deployment, and utilized Amazon CloudWatch for basic monitoring and logging.
- **Data Base Management:** Worked with SQL databases (MySQL) to manage structured relational data.Used MongoDB to handle unstructured and semi-structured NoSQL data at scale.Designed efficient schemas, indexes, and optimized queries to improve database performance. Contributed to applications built using monolithic and microservices architectures, focusing on scalable data design and efficient backend interactions

Internship

06/2024 - 12/2024

Full Stack Development

Tech Stack: ReactJS, Node.js, MySQL, Flask

- Built a real-time monitoring dashboard using ReactJS, Node.js, Flask, and MySQL with live data updates.
- Implemented and integrated REST APIs, WebSocket-based real-time communication, and backend services.
- Supported end-to-end development, including database design and deployment on IIS and Nginx servers.

Education

Bachelor of Science in Computer Science and Enginerring 2020-2024

SNS College of Technology, TamilNadu India **CGPA:** 8.86

Secondary Education 2018-2020

St.Joseph's Matric High School*, Coimbatore ,TamilNadu India* **Percentage :** 80.8

Technical Skills

- **Languages** : JavaScript / TypeScript, Python, Java, SQL
- **Frontend** : React.js, Redux, TanStack Query, HTML5, CSS3, Tailwind CSS, Bootstrap
- **Backend** : Node.js, Flask, REST APIs, JWT Auth, RBAC, Microservices, Spring (exposure)
- **Cloud & DevOps** : AWS (Lambda, S3, API Gateway, CloudWatch) , Git, CI/CD
- **Databases** : MySQL (SQL), MongoDB (NoSQL), Schema design, Query optimization
- **Testing & Tools** : Jest (Unit Testing), Postman, Swagger, Chrome DevTools
- **Architecture** : Microservices, Monolithic, Serverless, Event-driven systems
- **Security** : JWT, Role-based access control, Secure file uploads, Input validation
- **Soft Skills** : Leadership, Cross-functional collaboration, Problem-solving, Adaptability

Projects

Tapio.cards – NFC Smart Business Card Solution https://www.tapio.cards/

- Tech Stack: NFC Technology, React.js, Node.js, MongoDB, REST APIs, AWS (Lambda, S3, API Gateway)
- Built a digital business card platform using NFC for quick and contactless data sharing
- Designed user profiles to store contact details, links, and portfolio information
- Implemented RESTful APIs for seamless data communication between frontend and backend
- Enabled users to design and customize their own NFC cards for personal branding
- Developed tap-based interaction to improve networking efficiency
- Replaced traditional business cards with a modern, eco-friendly solution

Smart Product & Defect Scanner Portal https://www.nkminfinity.com/client/demo

- Built a full-stack product lifecycle system with role-based dashboards (Admin, Vendor, Client) using React, Node.js, and MongoDB.
- Integrated OCR for invoice scanning, secure file uploads, warranty tracking, and JWT-based authentication.

Project Management Web Application https://www.rightupbussiness.store/

- Developed a web-based project management app with task assignment, priority, and deadline tracking.
- Enabled role-based collaboration, dashboards, and secure authentication to streamline workflows and improve team productivity.

Dreamstone CRM – Customer Relationship Management Platform https://www.rightuptechno.com/

- Tech Stack: React.js, Node.js, Express.js, MySQL, REST APIs, JWT Authentication, Google Sheets Integration, AWS.
- Developed a production-deployed CRM platform with lead tracking, follow-up management, and sales pipeline monitoring.
- Implemented role-based dashboards, Google Sheets/Excel lead import, and secure authentication for sales teams.
- Built scalable APIs, optimized database performance, and provided production support in an Agile development environment.
